

- Designed for Complementary Use with BDW74, BDW74A, BDW74B, BDW74C and BDW74D
- 80 W at 25°C Case Temperature
- 8 A Continuous Collector Current
- Minimum  $h_{FE}$  of 750 at 3V, 3 A

**!** This series is obsolete and not recommended for new designs.

TO-220 PACKAGE  
(TOP VIEW)

Pin 2 is in electrical contact with the mounting base.

MDTRACA

### absolute maximum ratings at 25°C case temperature (unless otherwise noted)

| RATING                                                                             |        | SYMBOL              | VALUE       | UNIT |
|------------------------------------------------------------------------------------|--------|---------------------|-------------|------|

|                                                                                    | BDW73D |                     | 120         |      |
| Emitter-base voltage                                                               |        | $V_{EBO}$           | 5           | V    |
| Continuous collector current                                                       |        | $I_C$               | 8           | A    |
| Continuous base current                                                            |        | $I_B$               | 0.3         | A    |
| Continuous device dissipation at (or below) 25°C case temperature (see Note 2)     |        | $P_{tot}$           | 80          | W    |
| Continuous device dissipation at (or below) 25°C free air temperature (see Note 3) |        | $P_{tot}$           | 2           | W    |
| Unclamped inductive load energy (see Note 4)                                       |        | $\frac{1}{2}LI_C^2$ | 75          | mJ   |
| Operating junction temperature range                                               |        | $T_j$               | -65 to +150 | °C   |
| Operating temperature range                                                        |        | $T_{stg}$           | -65 to +150 | °C   |
| Operating free-air temperature range                                               |        | $T_A$               | -65 to +150 | °C   |

NOTES: 1. These values apply when the base-emitter diode is open circuited.

2. Derate linearly to 150°C case temperature at the rate of 0.64 W/°C.

3. Derate linearly to 150°C free air temperature at the rate of 16 mW/°C.

4. This rating is based on the capability of the transistor to operate safely in a circuit of:  $L = 20 \text{ mH}$ ,  $I_{B(on)} = 5 \text{ mA}$ ,  $R_{BE} = 100 \Omega$ ,  $V_{BE(off)} = 0$ ,  $R_S = 0.1 \Omega$ ,  $V_{CC} = 20 \text{ V}$ .

### PRODUCT INFORMATION

**electrical characteristics at 25°C case temperature (unless otherwise noted)**
