

## Series 364

3/8 in. sq., .5 Watt

Multi-turn, Sealed, Cermet Trimmer

## Series 364 Electrical Specifications

(per MIL-R-22097 where para. is noted)

**Resistance Range**  
10Ω thru 2 megohms

**Resistance Tolerance**  
10%

**Power Rating**  
0.5 watts at 85°C derated linearly to zero watts at 125°C.  
Maximum voltage not to exceed 400V.

**Effective Travel**  
25 turns nominal

**Temperature Coefficient Of Resistance**  
±100 ppm/°C, 100Ω thru 2 megohms;  
0 to +250 ppm/°C, below 100Ω.

**Dielectric Withstanding Voltage**  
1000 Vac at sea level;  
250 Vac at 80,000 feet (24,400 meters) (para. 3.10).

**End Resistance**  
2Ω or 1%, whichever is greater (para. 3.7.2)

**Insulation Resistance**  
1000 megohms minimum (para. 3.11)

**Contact Resistance**  
3% or 3Ω, whichever is greater (para. 3.9)

## Description

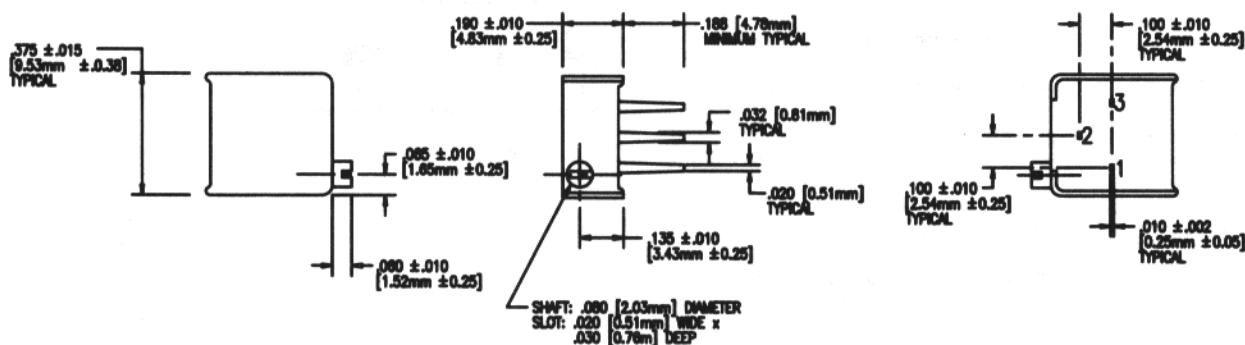

The 364 series is a low cost, 3/8 in. sq. (9.53 mm), multi-turn trimmer. Made in accordance to MIL-R-22097 standards, the 364 is sealed for cleaning in common solvents.

## Features

- **Low cost**
- **Superior setability and stability**
- **CRV to 3% or 3Ω**
- **4 standard terminal styles**

Figure 1

## Dimensions: 364P

## Series 364 Mechanical Specifications

### Stop

Contact idles at stops

### Operating Torque

5.0 oz. in. (360 gm. cm.) maximum

### Rotational Life

200 cycles minimum,  
2% maximum resistance change (para. 3.23)

### Weight

0.04 oz. (1.13 grams) maximum

### Resistance Element

Cermet

### Setability

0.05% Rt.

## Series 364 Operational Specifications

### Solderability

95% minimum surface coverage (para. 3.25)

### Terminal Strength

2 Lbs. (900 grams) minimum (para. 3.24)

### Sealing

Sealed to permit cleaning in common industrial solvents.

### Operating Temperature Range

-55°C to +125°C

|                           |                                   | Maximum Change | Total      |         |
|---------------------------|-----------------------------------|----------------|------------|---------|
|                           |                                   |                | Resistance | Setting |
| Thermal Shock             | -55°C to 125°C (para. 3.13)       | 2%             | 1%         |         |
| Moisture Resistance       | Mil-Std. 202, Method 103          | 2%             | -          |         |
| Shock                     | 100 G's 6 MS (para. 3.16)         | 1%             | 1%         |         |
| Vibration                 | 30 G's 10 to 2000 Hz (para. 3.17) | 1%             | 1%         |         |
| Resistance To Solder Heat | 350°C for 3 seconds (para. 3.19)  | 1%             | -          |         |
| Load Life                 | 1000 hours (para. 3.20)           | 3%             | 1%         |         |
| Low Temperature Operation | -55°C (para. 3.21)                | 2%             | 2%         |         |
| High Temperature Exposure | +125°C (para. 3.22)               | 3%             | 2%         |         |
| Rotational Life           | 200 Cycles minimum (para. 3.23)   | 2%             | -          |         |

### Marking (Unit Identification)

Manufacturer's name and part number including EIA resistance code, date code and terminal identification.
