

IBB110P **Integrated Telecom Circuits**

Parameter	Rating	Units
Blocking Voltage	350	V _P
Load Current	100	mA
Max On-resistance	35	Ω

Features

- 3750V_{rms} Input/Output Isolation
 Three Functions in One Package
- Bidirectional Current Sensing
- Bidirectional Current Switching
- FCC Compatible
- No EMI/RFI Generation
- Small 16-Pin SOIC Package (PCMCIA Compatible)
- · Machine Insertable, Wave Solderable
- Tape & Reel Versions Available

Applications

- Telecommunications
 - Telecom Switching
 - Tip/Ring Circuits
 - Modem Switching (Laptop, Notebook, Pocket Size)
 - · Hook Switch
 - Dial Pulsing
 - · Ground Start
 - Ringing Injection
- Instrumentation
 - Multiplexers
 - Data Acquisition
 - · Electronic Switching
 - I/O Subsystems
 - Meters (Watt-Hour, Water, Gas)
- Medical Equipment-Patient/Equipment Isolation
- Security
- Aerospace
- Industrial Controls

Description

The IBB110P Multifunction Telecom switch combines two 350V normally closed (1-Form-B) relays and one optocoupler in a single package. The relays use optically coupled MOSFET technology to provide $\mathrm{1500V}_{\mathrm{rms}}$ of input to output isolation. The efficient MOSFET switches and photovoltaic die use Clare's patented OptoMOS architecture, while the optically coupled output is controlled by highly efficient GaAlAs infrared LEDs. Circuit designers using the IBB110P can combine three discrete functions in a single package, thus using less space than traditional discrete component solutions.

Approvals

- UL Recognized Component: File E76270
- CSA Certified Component: Certificate 1305490
- EN/IEC 60950-1 Certified Component: TUV Certificate: B 09 07 49410 006

Ordering Information

Part #	Description	
IBB110P	16-Pin SOIC (50/Tube)	
IBB110PTR	16-Pin SOIC (1000/Reel)	

Pin Configuration

- 1. (N/C) 2. + LED - Form B Relay #1
- 3. LED Form B Relay #1
- 4. + LED Form B Relay #2
- 5. LED Form B Relay #2
- 6. Emitter Phototransistor 7. Collector - Phototransistor
- 8. (N/C)
- 9. LED Phototransistor +/-
- 10. LED Phototransistor -/+
- 11. Output Form B Relay #2
- 12. Common Source Relay #2
- 13. Output Form B Relay #2 14. Output - Form B Relay #1
- 15. Common Source Relay #1
- 16. Output Form B Relay #1

Switching Characteristics of Normally Closed Devices

Absolute Maximum Ratings @ 25°C

Parameter	Ratings	Units
Input Control Current, Relay	50	mA
Total Package Dissipation ¹	1	W
Isolation Voltage, Input to Output	3750	V _{rms}
Operational Temperature	-40 to +85	°C
Storage Temperature	-40 to +125	°C

¹ Derate linearly 1.67 mW / °C

Absolute Maximum Ratings are stress ratings. Stresses in excess of these ratings can cause permanent damage to the device. Functional operation of the device at conditions beyond those indicated in the operational sections of this data sheet is not implied.

Electrical Characteristics @25°C: Relay Section

Parameter	Conditions	Symbol	Min	Тур	Max	Units

Manufacturing Information

Moisture Sensitivity

All plastic encapsulated semiconductor packages are susceptible to moisture ingression. Clare classified all of its plastic encapsulated devices for moisture sensitivity according to the latest version of the joint industry standard, **IPC/JEDEC J-STD-020**, in force at the time of product evaluation. We test all of our products to

the maximum conditions set forth in the standard, and guarantee proper operation of our devices when handled according to the limitations and information in that standard as well as to any limitations set forth in the information or standards referenced below.

Failure to adhere to the warnings or limitations as established by the listed specifications could result in reduced product performance, reduction of operable life, and/or reduction of overall reliability.

This product carries a **Moisture Sensitivity Level (MSL) rating** as shown below, and should be handled according to the requirements of the latest version of the joint industry standard **IPC/JEDEC J-STD-033**.

Device	Moisture Sensitivity Level (MSL) Rating		
IBB110P	MSL 1		

ESD Sensitivity

This product is ESD Sensitive, and should be handled according to the industry standard JESD-625.

Reflow Profile

This product has a maximum body temperature and time rating as shown below. All other guidelines of **J-STD-020** must be observed.

Device	Maximum Temperature x Time		
IBB110P	260°C for 30 seconds		

Board Wash

Clare recommends the use of no-clean flux formulations. However, board washing to remove flux residue is acceptable. Since Clare employs the use of silicone coating as an optical waveguide in many of its optically isolated products, the use of a short drying bake could be necessary if a wash is used after solder reflow processes. Chlorine- or Fluorine-based solvents or fluxes should not be used. Cleaning methods that employ ultrasonic energy should not be used.
