CASCADE SERIES DIRECT-TO-AIR THERMOELECTRIC ASSEMBLY

The DA Cascade Series is an Air to Air thermoelectric assembly (TEA) that offers dependable, compact performance by cooling objects via conduction. Heat is absorbed through a cold plate and dissipated thru a high density heat exchanger equipped with an air ducted shroud and brand name fan. The thermoelectric modules are custom designed multistage cascades to achieve a high temperature differential, which allows this series to reach colder temperatures than standard DA product offerings. Custom configurations and moisture protection options are available, however, MOQ applies.
