

04C 20T Sprocket

SKU: 83702 Weight: 60.00 Gram

The chain can be used together with the sprocket for transmission of motion and power. Compared with synchronous belt, the chain can transmit more force and drive large load.

Features:

- It is made of integrated steel, capable of bearing large strength.
- Through M5x5 of jackbolt, it can firmly combine with 8mm of D-shaped shaft.
- By surface blackening, it can prevent rusting and increasing rigidity.

Specifications:

- Type: Shaft
- Material: Steel
- Inner diameter: 8 mm
