

- ·5"×3" miniature size
- ·Universal AC input / Full range
- ·Built-in active PFC function
- ·EMI Class B for Class I & Class A for Class Ⅱ configuration
- ·No load power consumption<0.5W
- ·High efficiency up to 94%
- Protections: Short circuit / Overload / Over voltage / Over temperature
- ·Cooling by free air convection for 250W and 400W with 25CFM forced air
- ·Built-in 12V/0.5A FAN supply
- ·Standby 5V@1A with fan, 0.6A without fan
- ·Built-in remote sense function
- ·LED indicator for power on
- ·Output 18V available
- ·Operating altitude up to 5000 meters
- ·3 years warranty

# 00

## Applications

- ·Industrial automation machinery
- ·Industrial control system
- ·Mechanical and electrical equipment
- ·Electronic instruments, equipments or apparatus

#### Description

EPP-400 is a 400W highly reliable green PCB type power supply with a high power density on the  $5^{\circ}$  by  $3^{\circ}$  footprint. It accepts  $80\sim264$ VAC input and offers various output voltages between 12V and 48V. The working efficiency is up to 94% and the extremely low no load power consumption is down below 0.5W. EPP-400 is able to be used for both Class I (with FG) and Class II(no FG) system design. EPP-400 is equipped with complete protection functions; it is complied with the international safety regulations such as TUV EN62368-1, TUV EN60335-1, UL62368-1 and IEC62368-1. EPP-400 series serves as a high price-to-performance power supply solution for various industrial applications.

- Tolerance : includes set up tolerance, line regulation and load regulation.
   Derating may be needed under low input voltages. Please check the derating curve for more details.
   Touch current was measured from primary input to DC output.
- 6. The power supply is considered a component which will be installed into a final equipment. All the Class I (with FG) EMC test are been executed by mounting the unit on a 360mm\*360mm metal plate with 1mm of thickness. The Class II (without FG) EMC test is been executed by mounting the unit on a 130mm\*86.6mm metal plate with 1mm of thickness. final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)
- 7. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).

| Pin No. | Assignment | Mating Housing           | Terminal                          |
|---------|------------|--------------------------|-----------------------------------|
| 1       | AC/N       | 1071/10                  | 107.01/11.017.01                  |
| 2       | No Pin     | JST VHR<br>or equivalent | JST SVH-21T-P1.1<br>or equivalent |
| 3       | AC/L       | or equivalent            |                                   |

## Function Connector(CN95): TKP DH2L-2X2 or equivalent

| Pin No. | Assignment | Mating Housing           | Terminal      |
|---------|------------|--------------------------|---------------|
| 1       | 5VSB       | TI/D DI IO               | TKP           |
| 2,4     | DC COM     | TKP DH2<br>or equivalent | or equivalent |
| 3       | PS-ON      |                          | or oquivaloni |

## FAN Connector(CN12): TKP 8812-2 or equivalent

| Pin No. | Assignment | Mating Housing | Terminal      |
|---------|------------|----------------|---------------|
| 1       | DC COM     | TKP 2502       | TKP 8811      |
| 2       | +12V       | or equivalent  | or equivalent |

#### DC Output Connector (CN2,CN3)

| Pin No. | Assignment | Output Terminals                 |  |  |
|---------|------------|----------------------------------|--|--|
| CN2     | -V         | M3.5 Pan HD screw in 2 positions |  |  |
| CN3     | +V         | Torque to 8 lbs-in(90cNm)max.    |  |  |

#### Function Connector(CN11): TKP DH2I-2X2 or equivalent

|         | ,          | ,              |               |
|---------|------------|----------------|---------------|
| Pin No. | Assignment | Mating Housing | Terminal      |
| 1       | -S         |                |               |
| 2       | +S         | TKP DH2        | TKP           |
| 3       | DC COM     | or equivalent  | or equivalent |
| 4       | PG         |                |               |

IN HS1,HS2,HS3,HS4 can not be shorted

Note: When the input voltage is AC 230V the model delivers EMI Class B for both conducted emission and radiated emission for the power supply, When the input voltage is AC110V the model delivers EMI Class B for conducted emission, Class A for radiated emission for the power supply.

It delivers Class A for conduted emission and radiated emission, when configured into Class  $\Pi$  (without FG) system.
