Part Number : SW163052 - KEELOQ Advanced Security Algorithms

The Advanced Security Algorithms CD-ROM for the KeeLoq 3 Development Kit contains the KeeLoq enhanced AES and XTEA algorithms. These algorithms will allow the development of KeeLoq security systems with 128-bit encryption keys, and longer data transmissions for a higher level of security. An enhanced KeeLoq Plug-in that calculates the 128-bit encryption keys is included with this CD.
