8GB DDR3 PC3-12800 Unbuffered NON-ECC 1.5V 1024Meg x 64

CT102464BA160B

- **Brand:** Crucial
- **Form Factor:** UDIMM
- **Capacity:** 8GB
- **Warranty:** Limited Lifetime
- **Specs:** DDR3 PC3-12800 • CL=11 • Unbuffered • NON-ECC • DDR3-1600 • 1.5V • 1024Meg x 64
- **Series:** Crucial

8GB DDR3 PC3-12800 Unbuffered NON-ECC 1.5V 1024Meg x 64
product information

Product Specifications

Brand ?	Crucial
Form Factor ?	UDIMM
Capacity ?	8GB
Warranty ?	Limited Lifetime
Specs ?	DDR3 PC3-12800 • CL=11 • Unbuffered • NON-ECC • DDR3-1600 • 1.5V • 1024Meg x 64 •
Series ?	Crucial
ECC ?	NON-ECC
Kit Qty ?	1
Speed ?	1600 MT/S
Tracer ?	False
Voltage ?	1.5V
DIMM Type ?	Unbuffered
Bullet Features ?	Increases system performance

More information

DDR3 240-pin DIMM

Approximately 5.25 in. by 1.18 in. (133.35 mm by 30 mm)

Crucial 240-pin DIMMs are used in DDR3 memory for desktop computers. DDR3 is the latest generation of memory with an improved architecture that allows it to transmit data more quickly.

A dual inline memory module (DIMM) consists of a number of memory components (usually memory chips) attached to a printed circuit board (usually green). The gold pins on the bottom of the DIMM provide a connection between the module and a socket on a larger printed circuit

board. The pins on the front and back of a DIMM are not connected to each other.

Each 240-pin DIMM provides a 64-bit data path (72-bit for ECC or registered or Fully Buffered modules). (The Ballistix™ and Ballistix Tracer™ high-performance memory do not come in 72-bit or registered modules.) Standard DDR3 240-pin DIMMs are currently available in PC3-8500 (DDR3 1066MHz) and PC3-10600 (DDR3 1333MHz) speeds. Additional speeds will be added as the technology becomes available.

To use DDR3 memory, your system motherboard must have 240-pin DIMM slots and a DDR3-enabled chipset. This is because a DDR3 SDRAM DIMM will not fit into a standard DDR2 DIMM socket or a DDR DIMM socket.

The number of black components on a 240-pin DIMM can vary, but it always has 120 pins on the front and 120 pins on the back, for a total of 240. 240-pin DIMMs are approximately 5.25 inches long and 1.18 inches high, though the heights can vary. While 240-pin DDR3 DIMMs, 240-pin DDR2 DIMMs, 184-pin DDR DIMMs, and 168-pin DIMMs are approximately the same size, 240-pin DIMMs and 184-pin DIMMs have only one notch within the row of pins.
