Application Tooling Specification

FEATURES

- Quick punch removal with the push of a button for fast and easy tooling change
- Applicator designed to industry-standard mounting and shut height 135.80mm (5.346")
- Quick setup time; plus, the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of 0.15mm (.0006") for conductor crimp height and .063mm (.0025") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other
- Directly adapts to most automatic wire processing machines

SCOPE

Products: Micro-Lock PLUS, 1.25mm (.049") Wire-to-Board Crimp Terminals, 26-30 AWG.

Terminal Series No.	Terminal Order No.	Wire Size		Insulation Diameter				Strip Length	
		AWG	mm ²	(see note) ♦		Terminal ♦♦		mm	In.
505431	505431-1000 505431-1100	26-30	0.12-0.05	0.78-0.90	.031-.035	0.78-1.02	.031-.040	1.40-1.60	.055-.063

♦ To ease terminal insertion onto the connector housing, use this insulation OD range.
Due to the narrow connector spacing, IPC/WHMA-A-620 crimps are not attainable.

♦♦ Overall insulation OD specification for terminal.

Oiler (Order No. 63801-7240) is required to crimp these terminals. See FineAdjust manual (Order No. 63800-4900).

DEFINITION OF TERMS

The above terminal drawing is a generic terminal representation. It is not an image of any terminal listed in the scope.

INSULATION CRIMP FORM

This crimp terminal is designed for miniaturization; therefore, each dimension of insulation crimp portion appears small as compared to the terminal material thickness. In order to avoid insulation piercing the crimp forms by the insulation barrel, coining is provided on the inside of the insulation barrel. For this reason, various crimp forms will occur at the tip of the insulation crimp barrel shown in the figure below.

These crimp forms may be changed completely by a small change in the wire, insulation punch or terminal.

These crimp forms are satisfactory for original function of the insulation crimp portion, and it is confirmed that all of these forms represent acceptable insulation crimps.

CRIMP SPECIFICATION

Terminal Series No.	Bell Mouth		Cut-Off Tab Maximum		Conductor Brush	
	mm	In.	mm	In.	mm	In.
505431	0.10-0.30	.004-.012	0.10	.004	0.10-0.30	.004-.012

Terminal Series No.	Bend Up	Bend Down	Twist	Roll	Punch Width mm (Ref)				Seam
	Degree		Degree		Conductor		Insulation		
					mm	In.	mm	In.	
505431	2	3	3	4	0.85	.034	0.90	.035	Seam shall not be open and no wire allowed out of the crimping area

After crimping, the conductor profile should measure the following:

Terminal Series No.	Wire Size	Conductor Crimp Height		Pull Force Minimum	
	AWG	mm	In.	N	Lb.
505431	26	0.54-0.59	.021-.023	19.6	4.40
	28	0.49-0.54	.019-.021	9.8	2.20
	30	0.46-0.51	.018-.020	4.9	1.10

Terminal Series No.	Wire Size	Insulation			
	AWG	Crimp Height (Ref.)		Crimp Width (Ref.)	
		mm	In.	mm	In.
505431	26	1.35	.053	1.00	.039
	28	1.30	.051	1.00	.039
	30	1.25	.049	1.00	.039

Tool Qualification Notes

1. Pull force should be measured with no influence from the insulation crimp.
2. The above specifications are guidelines to an optimum crimp.

PARTS LIST

FineAdjust Applicator 63904-2300				
Item	Order No.	Engineering No.	Description	Quantity
Perishable Tooling				
	63904-2370	63904-2370	Tool Kit (All "Y" Items)	REF

ASSEMBLY DRAWING

NOTES

1. Molex recommends that an extra perishable tooling kit be maintained at your facility.
2. Verify tooling alignment by manually cycling the press and applicator before crimping under power. Check that all screws are tight.
3. Slugs, terminals, dirt and oil should be kept clear of the work area.
4. Wear safety glasses at all times.
5. For recommended maintenance, refer to the FineAdjust manual.

CAUTION: This applicator should only be used in a press with a shut height of 135.8mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire-processing manufacturer's instruction manual.

CAUTION: Molex crimp specifications are valid only when used with Molex terminals, applicators and tooling.
