

Conforms to EN1088, EN60947-5-1, EN292, EN60204-1 UL and C-UL listed, BG approved

# **TL4024**

# Safety Interlock Switch with Guard Door Locking

- High locking force of 1500 N (337 lb.) locks guard door shut until machine is safe to enter
- IP67 (NEMA 6) enclosure enables the TL4024 to withstand water washdown
- Door and lock monitoring—the TL4024 has a total of 4 contacts: 2 N/C safety + 1 contact for door position monitoring + 1 contact for lock monitoring
- Unlocking is possible with a back load on the door to satisfy the demands of high cycle time applications

- Narrow profile enables mounting to 2 in. square tubing or in applications with space restrictions
- Rotatable head—the rotatable head of the TL4024 provides 8 actuator entry positions to satisfy most installation requirements
- Optional key release—this option on power-to-unlock models allows manual unlocking of the guard door
- Optional slide bolt with integral door handle aids installation on sliding and swinging guard doors

- Two LED (red/green) status indicators on the lid may be wired to suit the application
- Long life—the TL4024 is designed for a minimum of one million actuations with its variety of stainless steel actuators

**Go to the Engineering Guide**For in-depth information on safety standards and use.

For More Guarding Products See Section N for safeguarding cutting and turning machines

#### Operation

The head may be rotated in 90 degree increments to give 8 possible entry points.

#### **Flat Actuator**

Flexible rubber mounting bushings allow for some actuator flexibility.

#### 90-Degree Actuator

Flexible rubber mounting bushings allow for some actuator flexibility.

#### Flexible 1 Actuator

15 degree flexibility may be adjusted with the set screw.

#### Flexible 2 Actuator

15 degree flexibility may be adjusted with the set screw.

#### **Optional Slide Bolt**

- Allows easy installation of switch on machine guards
- Actuator included (order switch separately)
- Integral handle included
- Robust for use with heavy doors
- Slotted hole in bolt permits attaching multiple padlocks
- Yellow color for easy recognition

#### **Optional Key Release**

A key release unit is easily attached to the TL4024 to provide emergency override of the switch locking mechanism by a qualified, responsible person.

### **Optional SLD Series**

Optional switch locking devices are available. See accessories section for details.

#### Operation (continued)

#### **Contact Arrangements**

#### With Door Contact PLUS With & Without Back Load Unlocking

2WDB 2 positively driven N/C contact + 1 N/O + 1/NC as door contact 3WDB 2 positively driven N/C contact + 1 N/O + 1/NO as door contact

3WDB

### Applications

Typical applications are on sliding guard doors and swinging guard doors that must remain locked until a signal is applied to the internal solenoid that unlocks the guard door.

Go to the Engineering Guide For in-depth information on safety standards and use.

For More Guarding Products See Section N for safeguarding cutting and turning machines

# ApplicationMonitoring Units

#### **SR223SMT Timer Unit**

Used with the TL4024 for machines with constant overrun. Gives a timed delay to the lock/release signal. Failsafe and adjustable to a range of times from 1.0 seconds up to 31 seconds.

For information on the SR223SMT, see page H82

# **SR125SMS Stop Motion Sensing Unit**

Used with the TL4024 for machines with inconstant or variable overrun. Senses back EMF of AC or DC motors. Failsafe and adjustable to a range of 0.01 V to 0.10 V.

For information on the SR125SMS, see page H42

#### **Safety Monitoring Relay Units**

Safety monitoring relays ensure a maximum level of safety by monitoring all wiring in the safety circuit, including switches and contactors. Any fault and the power to the machine is switched off. A variety of safety monitoring relay units are available.

For information on Safety Monitoring Relays, see page H1

#### Specifications

2 N/C			
1 N/O + 1 N/C			
1 N/O + 1 N/O			
230 V – 4 A			
24 V – 4 A			
Silver alloy with gold flash			
12 V 10 mA, 24 V 1 mA			
24 VAC/DC or 110 VAC (all -15% / +10%)			
8 W			
100% duty			
Any position			
4 x M5 screws (not supplied)			
Approximately 300 mm (12 in.) with 90-degree actuator			
1500 N (337 lb.)			
20 m/min.			
Anodized die-cast alloy			
Stainless steel			
3 x 0.5 in. NPT			
800 g (28 oz.)			
Red			
1 x 10 <sup>6</sup> minimum			
IP67 (NEMA 6)			
-20 to 80°C (-4 to 176°F)			
Water washdown			
EN1088, EN60947-5-1, EN292, EN60204-1			
CE marked for all applicable directives, UL and C-UL, BG			

Specifications are subject to change without notice.

Note: The safety contacts of the Omron STI switches are described as normally closed (N/C)—i.e., with the guard closed, actuator in place, and the machine able to be started.
