

Opticom® QuickNet™ Rack Mount Fiber Cassette Enclosure

specifications

Fiber cassette enclosure shall be designed to house, organize, manage and protect Opticom® QuickNet™ Pre-terminated Fiber Optic Cassettes and associated MTP* trunk cables, connectors, and patch cords. Enclosure shall accommodate all pre-terminated MTP* cassettes and include integral cable management and bend radius control for transition to vertical cable managers. Fiber optic enclosure shall be constructed of steel material. Molded front covers shall be removable for cabling and connector installation. Enclosure shall have multiple knockouts for a variety of trunk cable entry points.

technical information

Dimensions:	FCE1: 1.74"H x 19.00"W x 18.00"D (44.2mm x 483mm x 458mm), 1 RU FCE4: 6.62"H x 17.00"W x 16.40"D (168mm x 432mm x 417mm), 4 RU
Mounting:	FCE1: Integral mounting flange for installation in 19" EIA racks FCE4: Universal brackets (included) allow enclosure to fit in 19" or 23" rack
Accessories:	Mounting hardware and accessory kit with labels included

key features and benefits

Works with all Panduit® Opticom® QuickNet™ Pre-Terminated Fiber Optic Cassettes	Provides flexibility with fully modular solution for a variety of pre-terminated, rapid-deploy fiber installation and patching applications with LC, SC, ST or FJ® connectors
High patch field density	Uses fewer rack units saving valuable rack or cabinet space; up to 96 fibers in 1 RU using four cassettes in FCE1; up to 288 fibers in 4 RU using 12 cassettes in FCE4
Cable management and bend radius control	Provides proper cable routing pathways and minimum cable bend radius control to ensure end-to-end signal integrity and cable protection
Front-only access with slide-out, tilt-down drawer on FCE1	Improves patch cord and cable access for in-cabinet and top-of-rack mounting locations for improved installation, service, and inspection
Front and rear access doors with fixed bulkhead design on FCE4	Enables access of all patch cords and connectors through front door and access of all pre-terminated MTP* interconnect or trunk cabling through rear door; easier moves, adds, and changes for improved reliability and cost savings

applications

The Panduit® Opticom® QuickNet™ Rack Mount Fiber Cassette Enclosure is a component of the Opticom® QuickNet™ Fiber Cabling System. FCE enclosures serve as a transition point for pre-terminated MTP* interconnect or backbone cable patched to active equipment in data center server cabinets or switch racks. They can be used for fast, reliable patch field creation in pre-terminated cross-connect or inter-connect

main distribution areas (MDA) or horizontal distribution areas (HDA). The enclosures provide high patch field densities with the FCE1 housing four cassettes for up to 96 fibers in 1 RU and the FCE4 housing 12 cassettes for up to 288 fibers in 4 RU. Integral cable management, bend radius control, and slack management features protect fiber optic cables, patch cords, and connectors to ensure end-to-end signal integrity.
