Dimensioned drawing

Assembly instructions for PG 16 corrugated pipe
a = Corrugated screw connection
b = Corrugated pipe
c = N/C contact
Assembly instructions:
Cut the corrugated pipe in the groove to retain a round shape for insertion. The darker outer seal (not shown in the mounting diagram) is pulled inside out over the corrugated tube screw connection. The corrugated pipe is then inserted as far as possible into the corrugated tube screw connection until it audibly clicks into place. To open the screw connection, the yellow corrugated pipe N/C contact is firmly inserted between the locking clip and corrugated pipe, which is then removed.
