OBSOLETE July 18, 2011

# LVDS 18-Bit Color Flat Panel Display (FPD) Link - 65 MHz

#### **General Description**

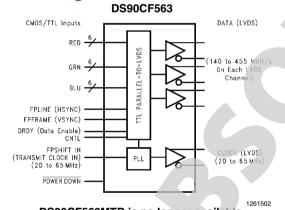

The DS90CF563 transmitter converts 21 bits of CMOS/TTL data into three LVDS (Low Voltage Differential Signaling) data streams. A phase-locked transmit clock is transmitted in parallel with the data streams over a fourth LVDS link. Every cycle of the transmit clock 21 bits of input data are sampled and transmitted. The DS90CF564 receiver converts the LVDS data streams back into 21 bits of CMOS/TTL data. At a transmit clock frequency of 65 MHz, 18 bits of RGB data and 3 bits of LCD timing and control data (FPLINE, FPFRAME, DRDY) are transmitted at a rate of 455 Mbps per LVDS data channel. Using a 65 MHz clock, the data throughput is 171 Mbytes per second. These devices are offered with falling edge data strobes for convenient interface with a variety of graphics and LCD panel controllers.

This chipset is an ideal means to solve EMI and cable size problems associated with wide, high speed TTL interfaces.

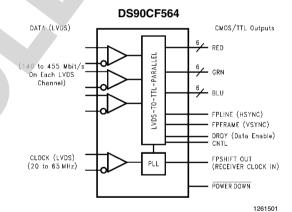

#### **Features**

- 20 to 65 MHz shift clk support
- Up to 171 Mbytes/s bandwidth
- Cable size is reduced to save cost
- 290 mV swing LVDS devices for low EMI
- Low power CMOS design (< 550 mW typ)
- Power-down mode saves power (< 0.25 mW)</p>
- PLL requires no external components
- Low profile 48-lead TSSOP package
- Falling edge data strobe
- Compatible with TIA/EIA-644 LVDS standard
- Single pixel per clock XGA (1024 x 768)
- Supports VGA, SVGA, XGA and higher
- 1.3 Gbps throughput

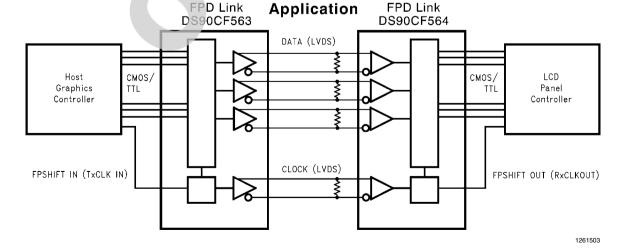

#### **Block Diagrams**

DS90CF563MTD is no longer available.

Order Number DS90CF564MTD See NS Package Number MTD48

	Power Down						

Note 1: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the device should be operated at these limits. The tables of "Electrical Characteristics" specify conditions for device operation.

Note 2: Typical values are given for  $V_{CC}$  = 5.0V and  $T_A$  = +25°C.

Note 3: Current into device pins is defined as positive. Current out of device pins is defined as negative. Voltages are referenced to ground unless otherwise specified (except  $V_{OD}$  and  $\Delta V_{OD}$ ).

Note 4: ESD Rating: HBM (1.5 k $\Omega$ , 100 pF)

PLL V  $_{CC} \ge 1000V$ All other pins  $\ge 2000V$ EIAJ  $(0\Omega, 200 \text{ pF}) \ge 150V$ 

### **Transmitter Switching Characteristics**

Over recommended operating supply and temperature ranges unless otherwise specified

Symbol	Parameter	Min	Тур	Max	Units	
LLHT	LVDS Low-to-High Transition Time (Figure 3)		0.75	1.5	ns	
LHLT	LVDS High-to-Low Transition Time (Figure 3)			0.75	1.5	ns
TCIT	TxCLK IN Transition Time (Figure 5)				8	ns
TCCS	TxOUT Channel-to-Channel Skew (Note 5) (Figure 6)				350	ps
TCCD	TxCLK IN to TxCLK OUT Delay @ 25°C, V <sub>CC</sub> = 5.0V (Figure 9)	3.5		8.5	ns	
TCIP	TxCLK IN Period (Figure 7)		15	Т	50	ns
TCIH	TxCLK IN High Time (Figure 7)		0.35T	0.5T	0.65T	ns
TCIL	TxCLK IN Low Time (Figure 7)	0.35T	0.5T	0.65T	ns	
TSTC	TxIN Setup to TxCLK IN (Figure 7)	f = 65 MHz	5	3.5		ns
THTC	TxIN Hold to TxCLK IN (Figure 7)		2.5	1.5		ns
TPDD	Transmitter Powerdown Delay (Figure 18)				100	ns
TPLLS	Transmitter Phase Lock Loop Set (Figure 11)				10	ms
TPPos0	Transmitter Output Pulse Position 0 (Figure 13)		-0.30	0	0.30	ns
TPPos1	Transmitter Output Pulse Position 1		1.70	1/7 T <sub>clk</sub>	2.50	ns

TPPos5	Transmitter Output Pulse Position 5		10.40	5/7 T <sub>clk</sub>	11.10	ns
TPPos6	Transmitter Output Pulse Position 6		12.70	6/7 T <sub>clk</sub>	13.40	ns

Note 5: This limit based on bench characterization.

### **Receiver Switching Characteristics**

Over recommended operating supply and temperature ranges unless otherwise specified.

Symbol	Parameter	Min	Тур	Max	Units	
CLHT	CMOS/TTL Low-to-High Transition Time (Figure 4)				4.0	ns
CHLT	CMOS/TTL High-to-Low Transition Time (Figure 4)			2.0	3.5	ns
RCOP	RxCLK OUT Period		15	Т	50	ns
RCOH	RxCLK OUT High Time f = 65 MHz					ns
RCOL	RxCLK OUT Low Time	f = 65 MHz	3.8	5		ns
RSRC	RxOUT Setup to RxCLK OUT	2.5	4.2		ns	
RHRC	RxOUT Hold to RxCLK OUT	4.0	5.2		ns	
RCCD	RxCLK IN to RxCLK OUT Delay @ 25°C, V <sub>CC</sub> = 5.0V	6.4		10.7	ns	
	(Figure 10)					
RPLLS	Receiver Phase Lock Loop Set (Figure 12)				10	ms
RSKM	RxIN Skew Margin (Note 6) (Figure 14)	600			ps	
RPDD	Receiver Powerdown (Figure 17)			1	μs	

Note 6: Receiver Skew Margin is defined as the valid data sampling region at the receiver inputs. This margin takes into account transmitter output skew (TCCS) and the setup and hold time (internal data sampling window), allowing for LVDS cable skew dependent on type/length and source clock (TxCLK IN) jitter.

RSKM ≥ cable skew (type, length) + source clock jitter (cycle to cycle)

### **AC Timing Diagrams**

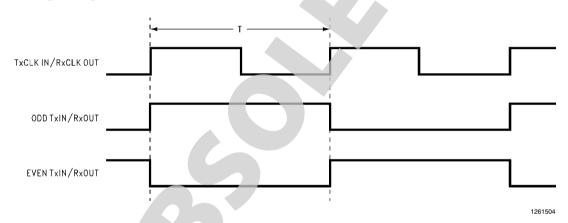

FIGURE 1. "Worst Case" Test Pattern

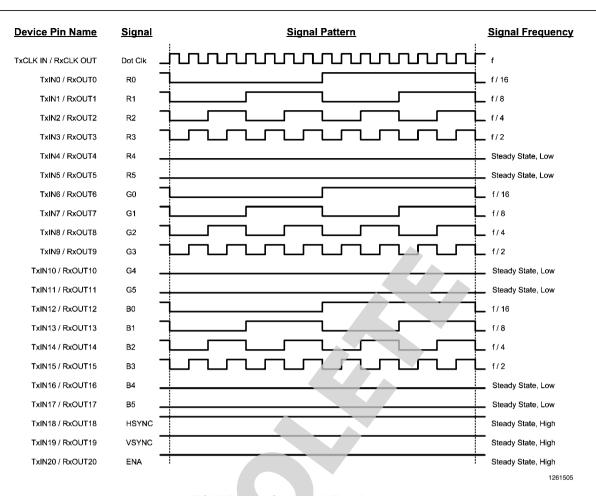

FIGURE 2. "16 Grayscale" Test Pattern

Note 7: The worst case test pattern produces a maximum toggling of digital circuits, LVDS I/O and CMOS/TTL I/O.

Note 8: The 16 grayscale test pattern tests device power consumption for a "typical" LCD display pattern. The test pattern approximates signal switching needed to produce groups of 16 vertical stripes across the display.

Note 9: Figure 1 and Figure 2 show a falling edge data strobe (TxCLK IN/RxCLK OUT).

Note 10: Recommended pin to signal mapping. Customer may choose to define differently.

#### LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE CHIEF EXECUTIVE OFFICER AND GENERAL COUNSEL OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

#### IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
