

## SmartOnline Double-Conversion UPS - 2U, USB, DB9, 230V, 3kVA, 2.5kW, On-Line

MODEL NUMBER: **SUINT3000RTXL2U**

3kVA UPS converts raw incoming AC power to DC, then re-converts DC to fulltime sine wave 230V AC output with zero transfer time.

### Features

**Double-Conversion UPS Protects Equipment against Damage, Downtime and Data Loss** This 230V 2U UPS system protects connected equipment against damage, downtime and data loss due to power outages, voltage fluctuations and transient surges. Featuring a 2500W capacity, high 0.8 power factor, 420 joules of surge suppression, true on-line operation with pure sine wave output and zero transfer time to battery, the SmartOnline® SUINT3000RTXL2U double-conversion UPS provides the highest level of battery backup and AC power protection for critical network closet, computer room and data center equipment.

**Individually Controllable Load Banks Let You Access and Control Outlets** Eight C13 outlets are even split into two switchable load banks, each allowing you to reboot connected equipment or shed loads remotely. In addition to the C13 outlets, this UPS provides two C19 outlets for powering critical components.

**Reliable, Expandable Battery Backup Keeps You Operational Through Power Outages** UPS battery backup keeps connected equipment operational through short power failures, and provides time to save data and perform an orderly system shutdown in case of a prolonged blackout. The field-replaceable, hot-swappable internal battery provides 15 minutes of support at half load and six minutes at full load. During normal operation, incoming utility power keeps the battery fully charged so backup power will be available when needed. For mission-critical applications demanding continuous uptime, the 3kVA UPS can provide expandable runtime with optional external battery packs, such as Tripp Lite's BP72V15-2U (sold separately).

**Easily Hot-Swappable with No Expensive Service Calls or Downtime Needed** Tripp Lite's optional PDUBHV20 bypass PDU (sold separately) enables hot-swappable UPS replacement with no disruption of power to connected equipment. When making repairs or replacing a battery, no lengthy service calls or downtime are necessary.

**Intuitive Front-Panel Interface for Convenient UPS Operation and Monitoring** Front-panel LEDs provide information on load and battery levels, operating mode, fault status and other critical data at a glance. The LED panel rotates for comfortable viewing in rack-mount or tower configuration.

**Advanced Communications Ports** This USB UPS system has USB and DB9 ports (cables are included) that enable data-saving unattended shutdown of connected systems when used with Tripp Lite's free downloadable PowerAlert® software. Capabilities include detailed monitoring of load levels, self-test data and utility power conditions.

**Versatile Installation Options** Hardware is included for mounting the UPS system in 2U of space in an EIA-standard 19-inch 4-post rack with a depth of only 66 centimeters (26 inches). Use the optional 2POSTRMKITWM (sold separately) for 2-post rack mounting or the optional 2-9USTAND (sold separately) for mounting in an upright tower position. The C20 power inlet accepts a variety of user-supplied input cords.
