Housings	
WAVEBOX	L.4 - L.7
EG-Series	L.8 - L.13
Housings, profile form	
RS-Series	L.14 - L.17
Housings, terminal form	
	L.18 - L.26

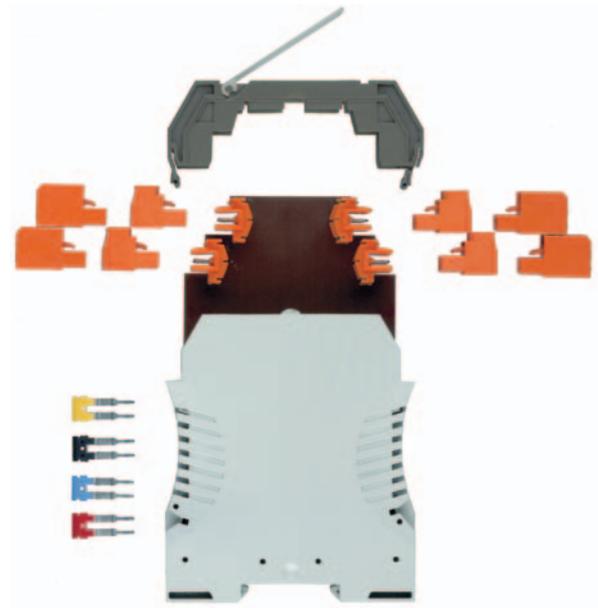

## Empty housings

### WAVEBOX housing

are designed to accept modern electronic components, thus representing functional casings that support adjustment and control functions as well as technical requirements, and allow heat dissipation and EMC properties. The compact design additionally saves space in the switch cabinet and reduces assembly costs. Furthermore, ergonomic design is becoming an increasingly important aspect of top quality electronic products and WAVEBOX has been developed accordingly to these criteria. The customer can save considerable costs with the simple production process (e.g. wave soldering, SMD configuration).

The excellent features of WAVEBOX include:

- Convenient, optimum width (12.5 mm, 17.5 mm, 22.5 mm)
- Large insertion area, suitable for SMD insertion on the soldered side
- Combustibility class V2 to UL94
- Assembly without tools
- Pluggable circuit board
- Pluggable cross connection using ZQV 2.5 N
- Hinged, transparent cover
- Plug-in connection
- Either clamping yoke or tension spring connection
- Marking with WS tags
- Slots onto TS 35 x 7.5 or TS 35 x 15

### EG 1 housing

are 18 mm wide and offer 4 screw connections. They also have up to 4 solder/flat push-on lugs 0.8 x 2.8 mm or 0.8 x 4.8 mm. Inside the enclosure, the busbar or screw terminal ends with a solder eyelet. Two end plates close the module. The modules are fitted in rows on mounting rail TS 32, TS 35 x 7.5 or TS 35 x 15, depending on the type.

### EG 2 housing

have the same outer contour as type EG 1. The PCBs, equipped with 4 screw or up to 8 spade connectors 0.8 x 6.3 mm or 0.8 x 2.8 mm, are simply clipped into the enclosure, using mounting rails TS 32, TS 35 x 7.5 or TS 35 x 15.

### EG 3 housing

are 22.5 mm wide with 6 screw or 12 spade connectors 0.8 x 6.3 mm or 0.8 x 2.8 mm. As optional accessories, Weidmüller offers a contour PCB with 2.54 mm hole matrix or completely copper-coated. The clip-on combination foot is ideal for mounting in rows on mounting rail TS 32, TS 35 x 7.5 or TS 35 x 15. The enclosure can be fixed directly using mounting plate MPL (without mounting rail). Thanks to the push-on foot design, the EG 3 housing enclosure can be turned at an angle of 180° for all kinds of assembly (e.g. for swapping input and output).

### EG 4 housing

offer the same width 22.5 mm as type EG 3. The greater depth of 75 mm and height of 109 mm allow more complex circuitry. The installed circuitry can be connected via 6 screw connectors. The clip-on combination foot is ideal for mounting in rows on mounting rail TS 32, TS 35 x 7.5 or TS 35 x 15. Thanks to the push-on foot design, the EG 4 housing enclosure can be shifted 6 mm forwards or back from the clip-on foot position, turned at an angle of 180°, then refitted (e.g. for swapping input and output).

### EG 5 housing

have the same outer dimensions as type EG 4. Type EG 5 has 12 screw connections wired with solder eyelets inside the enclosure. The clip-on combination foot is ideal for mounting in rows on mounting rail TS 32, TS 35 x 7.5 or TS 35 x 15. Thanks to the push-on foot design, the EG 5 housing enclosure can be shifted 6 mm forwards or back from the clip-on foot position, turned at an angle of 180°, then refitted (e.g. for swapping input and output).

### EG 6 housing

have a bus-compatible contact carrier. The bus connection is achieved by abutting several enclosures in a row. 32 connections on either side of the enclosures act as spring-type strip contacts. The enclosure can accommodate a PCB measuring 100 x 120 mm. The PCB is adapted by a VG 64 DIN socket. The front plate is screwed to the PCB, like 19" systems. The clip-on foot allows easy assembly in rows on mounting rails TS 35 x 7.5 or TS 35 x 15.

### Individual components for RS 70 clip-in base

Any type of intermediate spacers or feet can be joined and clipped together between two side pieces (locking feet). This produces a holder module for a PCB to which various components can be soldered. The assembly can be clipped onto mounting rails TS 32, TS 35 x 7.5 or TS 35 x 15.

### Clip-in base profiles

Profiles RS 45, RS 80 and RS 100 are supplied as extruded profiles 2 m long. The extruded profiles can be easily cut to the required length, producing a holder module for a PCB to which individual components can be soldered. The locking feet are pushed into the profiles for clipping onto the mounting rails TS 32, TS 35 x 7.5 or TS 35 x 15. The push-on foot design of RS 80 lets the locking foot turn at an angle of 180°.

### DK 4 and DKT 4 terminals

are ideal for installation of electronic components with a maximum thickness of 4.5 mm. Up to 4 independent clamping yoke screw connections are available. A clip-on frame extends the installation space of DK 4 by 6 mm. The terminals will fit on mounting rails TS 32, TS 35 x 7.5 or TS 35 x 15, depending on type.

### WDK 2.51 terminals

are ideal for installation of electronic components with a maximum thickness of 4 mm. 4 independent clamping yoke screw connections or 4 spade connectors 6.3 x 0.8 mm are available. The terminals will fit on mounting rails TS 35 x 7.5 or TS 35 x 15.

# Housings

## Wavebox

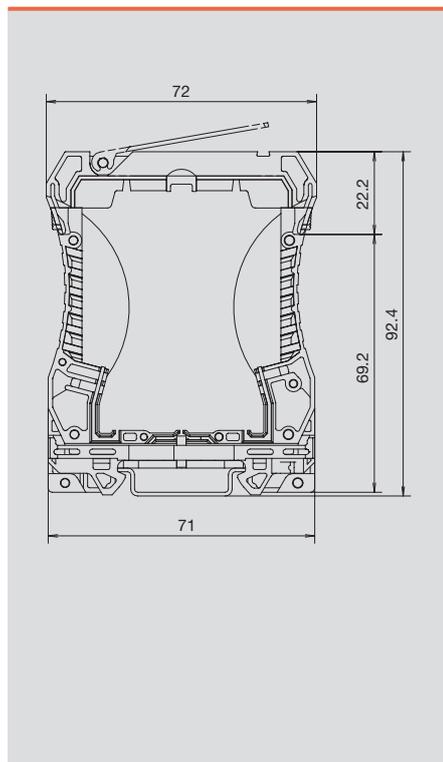

A WAVEBOX S 22.5 housing consists of:

- 1 housing base part with locking foot,
- 1 top part,
- 2 pin blocks,
- 1 to 2 connector sockets.

## Description

The pin blocks (one left- and one right-hand version are used depending on the design) are soldered to the PCB and clipped to the top part. This assembly is inserted into the base part; the integrated anti-turn protection guarantees a correct mechanical connection. Connections that are not required are sealed with a screw cap. The base of the housing is available in cross-connectable and non-cross-connectable versions. Both clamping yoke and tension clamp connections are available for the codable connector socket. The hinged transparent top plate of the top part and the housing base part can be labelled with a laser. The top plate enables an easy access for calibration.

CAD drawings that ease the production of layouts and equipping of boards (details of blocked area, max. component heights, pads, etc.) are available on request.

## EG

An EG4 housing consists of:

- 1 housing frame,
- 1 combination foot or 1 mounting plate,
- 1 to 2 clamping yoke units,
- 2 end plates.

## EG 4

### Technical data

#### General data

Larger housing are easily assembled: the intermediate plate (ZP) and the connection spigot (VZ) enable 2 or more housing to be mechanically joined together. The ZP joins together the housing frames in the area of the clamping yoke unit and the VZ the housing frames at the bottom of the frame. The fixing in combination foot or the mounting plate allows the housing to be mounted on the rail or directly.

# Housings, profile form

## RS 45

Configuration of the housings (plus 4 screws):

Rail-mounted version

- 2 end plates for Rail-mounting,
- 1 extruded profile,

Direct-mount version

- 2 end plates for direct mounting,
- 1 extruded profile,

## Description

3 heights are available for cover profile and end plates:

Rail-mounting:

TS32 = 45 mm, TS35x7.5 = 40.5 mm

Direct mounting: 24 mm

Dimensions of PCB

Thickness: 1.8 (+0.15) mm, width: 42 (+0.5) mm

Size of RS segment = PCB length - 4.5 mm

Size of ADP segment = PCB length - 1 mm

Example:

PCB length 160 mm, RS = 155.5 mm, ADP = 159 mm

# Housings, terminal form

## DK 5

The transparent fixing top plate is used for labelling.

A DK5 housing consists of:

- 1 modular terminal with busbars,
- 1 top plate,
- 1 end plate (if required).

## DKT 4-6

Maximum equipment level is 4 busbars plus 4 clamping yoke units. The available space for fittings and the number of connections can be doubled by adding one extra frame.

A DKT 4-6 series enclosure consists of:

- 1 terminal holder
- 1 top section
- 1-4 busbars
- 1-4 clamping yoke units
- 1 frame (if required)
- 1 end plate (if required)

## MCZ 1.5

The transparent pivotable top plate is used for labelling and calibration. Maximum equipment level requires 2 short and 3 long busbars. The available space for fittings and the number of connections can be doubled by adding one extra frame. CAD drawings that ease the production of layouts and equipping of boards (details of blocked area, max. component heights, pads, etc.), are available on request. The MCZ housing consists of:

- 1 terminal holder,
- 1 top plate,
- 1 to 5 busbars with tension spring,
- 1 end plate (if required).
